Transformasi Ekstraksi Literatur Akademik Berbasis Bukti

Penulis: Arby Sanjaya, Ph.D., Cahayu Putri, M.Sc.

DOI: 10.1016/j.modellyng.2026.04.012

ABSTRACT
This study investigates academic document extraction using evidence-centered analysis. We propose a novel framework th

1. INTRODUCTION & PROBLEM STATEMENT
Academic researchers face significant challenges in synthesizing literature across hundreds of publications. Current approa

2. METHODOLOGY & DATASET
We analyze a benchmark dataset consisting of 120 peer-reviewed computer science and medical papers. The model utilize

3. KEY FINDINGS & ANALYSIS TECHNIQUE
Evaluation reveals a 42% reduction in verification latency while preserving 100% citation grounding. The statistical ANOVA

4. LIMITATIONS & FUTURE WORK
A key limitation is the dependency on clean digital text; scanned documents require OCR preprocessing. Future work will ex

5. SCIENTIFIC NOVELTY & CONTRIBUTION
The fundamental novelty is the zero-hardcoding JSONB architecture coupled with verifiable evidence spans.
